

COVID Attendance Flowchart for 2021-22

If the student is absent and excused by the parent FOR ANY REASON, the absence should be marked as an "E". Schools do not need to track COVID-related absences in Skyward because these absences will be reflected on the District COVID-19 Dashboard.

Quarantine cases should be marked based on who made the decision to quarantine. If the quarantine is at the parent's direction or because of home or other exposure outside of school, enter an "E-Q" in Skyward. Work can be gathered at the parent's request on a schedule convenient for teachers and the school.

Quarantines at the direction of the District or Salt Lake County Health due to school-related exposure should be marked as "H-Q" to reflect the school connection to the quarantine requirement and the need for the school to actively provide work. A Home & Hospital teacher should NOT be assigned to quarantined students. Classroom teachers should provide work to these students regularly through any available means.

If a quarantining student tests positive for COVID during their quarantine and this information is communicated to the school by the parent, the student's absences should then be marked with an "E".
